## BAIN MARIES

QUEST quality features include

- Deluxe all stainless steel construction
- Powerful heaters for quick recovery
- Thermostat temperature control
- Large plate shelf
- Manual fill valve
- Manual drain valve
- Integrally wired to circuit breaker panel

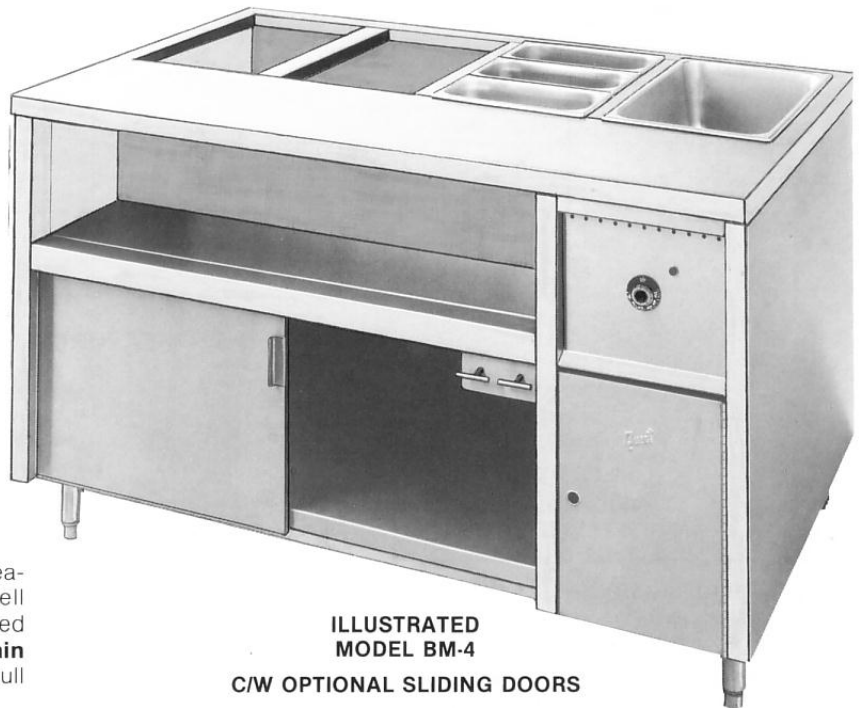

Many of the proven RET series hot food table features are incorporated. When individual well temperature control is not required or odd shaped utensils are to be accommodated the **Quest Bain Marie** is the answer. Table sizes from 3 to 8 full size pans are available.

Powerful immersion heaters are used for quick recovery bringing warm water to desired temperature with minimal waiting time. Water temperature selection is accurately controlled by the conveniently located thermostat complete with pilot light to indicate operation.

The heavy gauge stainless steel divider bars for 12 x 20 conventional inserts are removable and can be replaced with adapter plates to accept round inserts or the well could be left completely or partially open to accept special sized food containers . . . **FLEXIBILITY OPERATORS APPRECIATE.**

The large capacity 11" deep plate shelf and lower storage compartment are standard on all models. Stainless steel lift up doors, plate shelf heating . . . stainless steel sliding doors, and lower storage compartment heating are optional extras available at a reasonable charge. Infinite heat switches complete with pilot lights are supplied with these options giving the operator complete control over their use.

Cutting board if required is used on top of stainless steel surface. Cleaning is a breeze . . . simply wash the all stainless steel surface.

MODEL BM-4  
C/W OPTIONAL SLIDING DOORS

**Quest Bain Marie** tables are constructed entirely of heavy gauge stainless steel for durability and sanitation. Sanitary adjustable feet welded to heavy gauge full length channels support and provide complete rigidity to the table.

Filling and draining . . . simply operate the conveniently located manual fill or drain valves as required. Drain is complete with overflow for protection against over filling of tank. Definite plus features standard on all Quest Bain Marie hot food tables.

Standard (rarely available on competitive units) is the conveniently located circuit breaker panel with all internal wiring completed . . . an important service feature reducing field hook up costs and permitting isolation of components requiring repairs without shutting down the complete table.
