HEAVY DUTY GAS RANGE

ONE OVEN MODEL

QUEST Short Order Ranges, made in Canada for over 40 years, are feature packed, yet moderately priced; they have proven their worth due to their superior baking and roasting results, ability to stand up to the most rigorous use, and economy of operation.

The Short Order One Oven Hotel and Restaurant Range gives the user Speed, Economy, and flexibility of use. The QGR-1 is a full 36" wide. The popular top arrangement illustrated features 2 large star burners, and a fry top 26" deep and 21¼" wide x 5/8" thick. Made of heavy steel plate, with fully useable area, the welded grease-proof design is also non-warping and non-cracking. The grease can has an 8-pint capacity. The all flush top permits pots to be slid off the open burners to fry top for simmering. A 'closed top' can be obtained as an optional extra in place of two open burners. Stainless steel fronts are standard on all QUEST Ranges.

All QUEST Ranges have **stainless steel ovens**, no enamel crazing or cracking, no paint to chip. The stainless surface of the oven reflects heat which ensures even cooking.

The unique and proven oven design on all QUEST Ranges feature counterbalanced welded oven doors (no springs), for trouble-free positive closing and opening action, retarded venting and stainless steel clad transite oven deck for solid even heat baking and economical operation. **No other Gas Range will cook or bake as evenly.** The large ovens will accommodate 18" x 26" bake pans or extra large roast pans. Safety shut-off valve and thermostat control are conveniently located.

The simple streamlined design makes cleaning easy, and the range is engineered to be almost maintenance free. Long life is assured by the heavy steel body construction. The one oven model weighs 525 lbs. Features to help keep your kitchen cooler are the air-gap insulated high back, and the full-length vent under the plate shelf, which is 19" above the range top. All QUEST Ranges

These many Quality-Plus features assure you of longer equipment life, trouble-free operation, and superior cooking results. No other range provides you with this huge fry top and open burner combination. Here is the very best range for the medium to large size restaurant or institution. You'll be proud to own a QUEST Gas Range.

MODEL QGR-1

TOP 2-O.B. RFT

can be banked together and can be easily disassembled. See price list for additional oven rack, stainless steel ends, thermostatic control fry top, mobile, low back, high back and shelf.

When ordering always specify Model, Top Arrangement, Type of Gas, and optional extras required.

TOP ARRANGEMENT	MODEL	DESCRIPTION	BTU RATING	WEIGHT
	QGR-1 2-O.B. RFT Two Open Burner Right Fry Top	The Most Popular One Oven Model. Features 2 open star burners, balance heavy steel fry top, giving a full usable area of 26" deep by 21 1/4" wide. Large oven, full high back and shelf in standard stainless steel. Note—all flat top. Also available with Left Hand Fry Top as an optional extra.	149,500	Net 525 lbs. Shipping 600 lbs.
	QGR-1 6-O.B. Six Open Burner	Here's the range with full boiling and cooking capacity. Six large star burners provide fast heating. Full size oven and high back and shelf are standard. This model can be supplied with one, two or three sections converted to closed top.	193,500	Net 485 lbs. Shipping 560 lbs.
	QGR-1 FT Fry Top	The heavy duty thick steel plate fry top covers the full 36" width of the range. Includes all standard features. It's the ideal model for the operator who needs extra heavy duty fry top capacity. Can also be used for simmering.	117,500	Net 545 lbs. Shipping 620 lbs.
	HT Hot Top	The ideal top for heavy Stock Pot work. Big capacity for soups, stews, etc. The huge 36"x31" top can easily hold 4 of the largest pots with room to spare. Top is made in 2 rugged cast sections, each with removable ring and cover, and separately fired by Super Jet Burners. All castings are heavily studded beneath for maximum heat retention.	117,500	Net 810 lbs. Shipping 930 lbs.
OPTIONAL FEATURES				
	CT Closed Top	Closed Top. This solid section replaces a 2 open burner section. It is preferred by some cooks. Readily cleaned, and combines well with fry top or open burners. Not intended for frying.	Deduct 32,000 BTU's per Closed Section	Add 20 lbs. per Section
	LB Low Back	Low Back 17" High. In place of High back and shelf. For special venting installations, or where no plate shelf is needed. Made in gleaming stainless steel front.		Deduct 10 lbs. per Section
	EX Extension	Two Burner Extension. An extra handy 12" extension, on left or right. In 2 open burner or closed top style. A compact extra for bigger capacity. Includes extended high back and shelf, when factory supplied with range.	Add 52,000 BTU's	Add 60 lbs.

Stainless steel finish standard on front, hiback and shelf. Balance grey baked enamel. Stainless steel is essential where ease of cleaning, long life and gleaming appearance are important.

This QUEST range comes with one rack per oven. 3/4" back connections as shown below. Minimum door clearance 31" with back off. 3/4" pressure regulator required and supplied, installed (Nat. Gas).

GAS CONNECTIONS

Back: 30" from floor (22 3/4" with Regulator installed), 2 1/2" from open burner end.
