

flicker without the flame

smart choice

No wax. No smoke. No heat. No mess.

With its long-lasting, wind-proof ambient light, Smart Candle is perfect for:

INDOOR (bedroom, bathroom, dinner parties, dorm rooms)

OUTDOOR (patio, decks, backyard, garden, luminaries, camping, boating)

COMMERCIAL (restaurant, hotel, spas, churches, banquet halls, event planners, care facilities, corporate gifts)

SEASONAL (holiday gatherings, indoor and outdoor decorations)

NIGHT LIGHT (nursery and children's room, mood lighting)

SAFETY (emergencies, power outages, doorways and walkways)

smart technology

Enjoy the flicker.

Smart Candle uses intelligent electronics and LED's to generate a long-lasting, random, flickering light that perfectly simulates a wax candle flame.

Powered by either a rechargeable Nickel Metal Hydride (NiMh) battery (15 hours), 2 AAA alkaline batteries (50 hours), or 3 LR44 button batteries (20 hours).

smart safety

Don't sweat the flame.

Smart Candle is safe for both indoor and outdoor use and may be used with materials such as paper, wood, plastic, dried flowers and fabric. Candle-related fires caused by unattended open flames, hot wax, heat and flammable materials can result in catastrophic property damage, injuries and death. The flameless Smart Candle completely eliminates accidents associated with candles.

The logo consists of a white speech bubble with a tail pointing downwards and to the left. Inside the bubble, the words "smart" and "candle" are stacked vertically in a lowercase, sans-serif font.
