UCF-SERIES UNDERCOUNTER UNITS

Versatile, compact (29" deep) models for under the counter frozen storage of food products. Height is 34-1/2".

Cabinet Construction

Heavy duty construction includes #3 finish exterior stainless steel on front, sides, door(s) and grille. Cabinet back and bottom are galvanized steel. Interior liner is made of anodized aluminum for longer lasting corrosion protection. Interior thermometer is standard.

Cabinets are insulated with foamed-in-place polyurethane insulation of 2" minimum thickness, except top at 1-1/2". Doors are gravity self-closing mounted to cabinet on cam lift hinges with 120 degree stay open feature. Door openings include low voltage, anti-condensate heaters. A plug-in type vinyl magnetic gasket is attached to each door for positive seal. Convenient, contoured, pull handle is made of black anodized aluminum. An 8' cord set is provided with 115 volt models. Interior arrangement includes 2 steel wire epoxy coated shelves behind each door, adjustable in 1/2 inch increments.

Refrigeration:

Forced air refrigeration systems use capillary tube to meter refrigerant. Automatic electric defrost is standard. Unique front venting of air through grilles located below doors permits units to be installed against back walls and even on curbs. Automatic (non-electric) condensate evaporator is provided.
